

Mouse Monoclonal Antibody to ACHE

	Or	der Information
Catalog#	32394	
Size/Concentration	50ul	100ul
Price(¥)	1280	2180

Description

Acetylcholinesterase hydrolyzes the neurotransmitter, acetylcholine at neuromuscular junctions and brain cholinergic synapses, and thus terminates signal transmission. It is also found on the red blood cell membranes, where it constitutes the Yt blood group antigen. Acetylcholinesterase exists in multiple molecular forms which possess similar catalytic properties, but differ in their oligomeric assembly and mode of cell attachment to the cell surface. It is encoded by the single ACHE gene, and the structural diversity in the gene products arises from alternative mRNA splicing, and post-translational associations of catalytic and structural subunits. The major form of acetylcholinesterase found in brain, muscle and other tissues is the hydrophilic species, which forms disulfide-linked oligomers with collagenous, or lipid-containing structural subunits. The other, alternatively spliced form, expressed primarily in the erythroid tissues, differs at the C-terminal end, and contains a cleavable hydrophobic peptide with a GPI-anchor site. It associates with the membranes through the phosphoinositide (PI) moleties added post-translationally. AChE activity may constitute a sensitive biomarker of RBC ageing in vivo, and thus, may be of aid in understanding the effects of transfusion.

Specification		
Entrez GenelD	43	
Aliases	YT; ACEE; ARACHE; N-ACHE	
Clone#	3D5E8	
MW	67.8kDa	
Host/Isotype	Mouse IgG1	
Storage	$4^{\circ}\text{C};$ -20°C for long term storage. Avoid freeze /thaw cycles.	
Species Reactivity	Human, Mouse, Monkey, Rat	
Immunogen	Purified recombinant fragment of human ACH E expressed in E. Coli.	
Formulation	Purified antibody in PBS with 0.05% sodium a zide	

Application		
WB	1/500 - 1/2000	
FCM	1/200 - 1/400	
IHC	1/200 - 1/1000

WB - www.promab.com/protocol/wb.html IHC - www.promab.com/protocol/ihc.html ICC - www.promab.com/protocol/icc.html HCM - www.promab.com/protocol/hcm.html **Antigen Sequence** is available upon request.

For Research Only Application Key: WB - Western Blot | IHC - Immunohistochemistry | ICC - Immunocytochemistry | FCM - Flow Cytometry | ELISA - Enzyme-linked Immunosorbent Assay | IP - Immunoprecipitation

Mouse Monoclonal Antibody to ACHE

Western blot analysis using ACHE mouse mAb against PC-12 (1), Hela (2),mouse brai (3),NIH/3T3 (4),COS7 (5),Jurkat (6) and Raji (7) cell lysate.

Flow cytometric analysis of NIH/3T3 cells using ACHE mouse mAb (green) and negative control (red).

Immunohistochemical analysis of paraffin-embedded human prostate cancer tissues using ACHE mouse mAb with DAB staining.

Immunohistochemical analysis of paraffin-embedded human rectum cancer tissues using ACHE mouse mAb with DAB staining.
